## New Diver Package Only \$999

**Our New Diver Package combines quality name brand equipment with an affordable price that's designed to move, in more ways than one! Starting with a compact, weight integrated travel BC, joined by a solid regulator combination and topped off by a trim computer equipped console, this package is just waiting to accompany you to your next tropical destination.**

**TUSA's BCJ-1650 Passage** is a new style wrap-around BC that is lightweight and compact, ideal for warm water divers or the constant traveler. The BCJ-1650 offers TUSA patented

features such as the Passage Weight Loading System (W.L.S.), which permits easy weight loading and releasing, the Integrated Stabilizing Harness that was developed exclusively for the Passage significantly reducing weight and structure, and the Ultimate Stabilizing Harness which has two separated rails to increase the tank's security and prevent it from rolling. This is a lightweight and compact BC, making it very easy to carry.

**TUSA's SCA-251 Two Gauge Element Console** features the IQ-650

Element dive computer and a 4000 PSI pressure gauge in a compact low-profile two color boot. The computer console is a full-featured, user-friendly instrument with an innovative interface designed exclusively for divers.

**TUSA's RS-520 Regulator** is the latest TUSA first and second stage that delivers excellent quality in

an affordable, lightweight, travel-friendly system. The balanced piston R-500 first stage is incredibly small and weighs only 720g. It has a full complement of four low-pressure and two high-pressure ports and is equipped with a quick adjustment screw that can easily be tuned for optimum performance.

**TUSA's SS-20 Platina Safe-Second** combines the performance of the reliable SS-10 octopus, yet is

smaller and allows for both left and right hose configuration. The SS-20 Platina Octopus features a large front purge, deflection tube and deflector to reduce exhaust resistance for easier breathing. Equipped with a high visibility yellow housing and 33" yellow hose.
